The Mankato Clinic was founded in November 1916, by a small group of area physicians. Today, the Mankato Clinic provides quality health care at eleven facilities in south-central Minnesota communities. Mankato Clinic and its satellites rank among the top employers in the region.

Psychology @ Daniels Health Center

Mankato Clinic Psychologists at the Daniels Health Center in St. Peter, Minnesota work with the individual to gain understanding of how emotional, social, cognitive, health related and developmental concerns affect behavioral functioning across lifespan. Psychological services include assessments, psychological evaluation and psychotherapy.

Other services provided by the Department of Psychiatry and Psychology include initial evaluations/consultations, medication management, bipolar affective disorder group therapy.

Mankato Clinic scholarship recipients are chosen based on consideration of the following: overall GPA, psychology GPA, Psi Chi involvement, research involvement, community involvement and psychology career potential.
