The Women and Spirituality Conference was born in 1981 and the purpose was to provide a supportive and nurturing setting for a dialogue of caring and mutual respect between and among women and men from many spiritual and religious traditions. The conference does not advocate or exclude any view and continues to foster an understanding and celebration of similarities and differences. May we continue to aid one another on our individual and communal spiritual journeys.

SMUDGING, BLESSING, AND CREATING SACRED SPACE
Armstrong Hall 219
Discussion-based/ritual/worship

Everything in the universe is composed of energy. Each person, place, or thing has its own unique vibration. Our environment and everything around us takes on the energy of people and events. Frequently, this energy has a negative vibration that we can sense or feel. Smudging and ceremonial cleansing clears the emotional imprints that may have been collected over the years. This workshop will introduce you to a variety of tools and techniques used in cleansing and blessing rituals. Discover powerful methods for clearing yourself and your environment using herbs, crystals, and elemental energies. This class includes demonstrations for building theme altars which will create a focus for your wellness intentions.

Diane Anderson is the coordinator for academic appointments and promotions and instructor in Medical Education, Mayo Clinic College of Medicine, Rochester, MN. She is a healing arts practitioner and teacher whose practice includes Reiki, Energy Medicine, Qigong, and Shamanic healing.

STOP SEEKING THE DIVINE: BE A GROWN WOMAN AND INVITE YOURSELF IN FOR GOD’S SAKE
Armstrong Hall 233
Experiential/discussion-based

According to Patanjali, we are the Divine, we just forgot. This discussion intends to open the door to our right to be not only both (Isvara and a piece of Isvara that is in this material world but not of it) at the same time, but actually a third being, The Observer, by presenting the idea that once we invite the divine in, there is no need to continue to seek it, or to behave as if it is too special for us to enjoy, or to disappear in its presence. We are the presence of The Presence.

ACCESSING THE UNCONSCIOUS THROUGH TOUCH: THE IMPORTANCE OF HUMAN CONNECTION AS A HEALING TOOL
Centennial Student Union 254
Experiential
Besides fight/flight and freeze, there is a whole physiological system in the body which facilitates human connection, bonding, calm, nourishment, restoration, peace, and healing. Bodywork stimulates this connection of the body, mind, spirit, and emotions, and taps the hormones of love, peace, and connection that are hard-wired into human beings. The explosion of research in neuroscience confirms the importance of touch and contact for human development and well being for regulating our emotions and our physiology. In this workshop, we will present some of the new research in neuroscience confirming the importance of human connection, and of understanding human connection as a biological system in the body. It will demonstrate how gentle touch like Rosen Method Bodywork can stimulate this powerful healing system in the body. Rosen Method uses receptive touch and verbal dialogue to assist people in opening long, forgotten experiences and emotions, and to release unconscious limiting beliefs.

Discussion-based
Twenty-eight religions, philosophies, and moral/ethical systems include versions of the Golden Rule in their teachings. This universal emphasis means that spirituality is an inner experience expressed through worldly relationships. The spirituality behind spectacular success results from three ingredients: the relationship you have with yourself, creating success for others, and passing power to others. Real world examples show how to use the spiritual ingredients to create spectacular personal and professional success.

TIMELINE SHIFTING
Armstrong Hall 211
Experiential
Timeline Shifting can help people get out of a stuck-state and start realizing their goals and dreams. How one personally experiences the flow of time influences: 1) being stuck in the past, weighed down by past events; 2) seeing a positive future/or no future at all; 3) the ability to plan ahead or learn from the past, or 4) the inability to stay present. Participants will have the NLP (Neuro Linguistic Programming) Timeline Shift demonstrated to them and then will try it in pairs. NLP focuses on the submodality processes that happen in our brain to create emotions about remembered or imagined experiences, not the content of the experiences themselves. Come learn to control your internal processing and acquire more choices in relating to memories, the present, and imagined futures.

TRUTH AND AUTHENTICITY
Armstrong Hall 225
Discussion based

We know our behavior is authentic when we can consistently say what we mean, do what we say, and say what’s so when it’s so. When we summon the courage to risk telling the truth about who we are and are not. When we can tell the truth without blame or judgment to our own selves and all others, our words can be in harmony with our actions, and wisdom and authenticity emerge. The great opportunity and challenge of the second half of life may be to find and live our authentic life; when all that is false strips away and truth and trust emerge. Listen and be listened to as we explore truth, trust, and truth telling as ways of an authentic life.

Centennial Student Union 254
Discussion-based/experiential

In this workshop, we will engage in a guided meditation, followed by a discussion on how we are helped and hindered in our spiritual journeys by our spiritual history. To make progress in our spiritual journey, we need to come to terms with our spiritual past. We need to become aware of the baggage we choose to carry. We need to explore our biases and find ways to move beyond them. As an author of spirituality-based books, I recommend daily practice, along with most spiritual systems. However, 30 plus years of experience has taught me it’s not always easy. If you are interested in establishing a daily practice, or if you are not happy with the one you are doing, this is the workshop for you.

This simple yet powerful system is known as the #1 process being used all over the world to help people discover and live their passions. Statistics show that only 20% of working Americans are living their passions, the others are simply going through the motions, rather than living a life of joy and purpose. The Passion Test is a systematic process for helping people discover their passions and true calling in life.

MATRIARCHY IN MINOAN CRETE: A PERSPECTIVE FROM AR- CHAEOMYTHOLOGY AND MODERN MATRIARCHAL STUDIES
Also in Session IV
Armstrong Hall 317
Formal paper

Ancient Crete evokes for many the image of a highly sophisticated civilization: peaceful, artistic, and refined; a society in which women were highly visible and important, and the supreme deity was a Goddess. Yet despite the fact that authorities acknowledge that women played a major role in the Minoan society, and the preeminent Minoan deity was female, there is a gap in the scholarly literature regarding the role of women and matriarchy in Minoan Crete. In this workshop, we will discuss the results of the presenter’s dissertation in which using the latest archaeological finds, and the emergent fields of archaeomythology and modern matriarchal studies, she makes a compelling case for a matriarchal Bronze Age Crete based on the definition of matriarchy offered by Heidi Goettnert-Abendroth.

**INTRODUCTION TO ANIMAL/INTERSPECIAL COMMUNICATION**  
*Armstrong Hall 202*  
*Experiential*

The sixth sense is a natural sense humans have, and animals share. Often the things that we write off to coincidence are really our underdeveloped sixth sense at work. We each have a natural ability to communicate using thoughts, images, feelings, or words through the use of telepathy. Telepathy is the communication of feelings (pathos) over distance (tele). All living beings are wired to send and receive messages to one another in this way. When an old friend who has been on your mind calls “out of the Blue,” it’s not just a coincidence. In reality, there’s an ancient language at work. One we and our animal companions have in common.

Marilyn Tokach is a compassionate empath, healer, and teacher, seeking to empower both animals and humans to bring mutual understanding and harmony into their lives. Extensive corporate experience in human resources, management in interviewing, training/development, and conflict resolution, combined with Bachelor and Master’s studies in psychology and business administration, complement her work with people and animals. Active in rescue and animal related issues, Marilyn has trained dogs for 20+ years and participates in obedience, conformation, agility, and Schutzhund. She lives with dogs, birds, fish, and a cat.

Also in Session IV
Morris Hall 210
Story-telling/discussion-based
Women with bipolar disorder and women who love and support them reach deep into their well of spirit, hope, and endurance to establish and enhance their quality of life. In my doctoral thesis entitled, “Bipolar Disorder and Spirituality,” 100 people with bipolar disorder and their support people wrote of their struggles and strengths and their “well.” Their wisdom is worth listening to. Each participant will have the opportunity to tell their gifts of strength as well as hear other people’s stories. Barriers will also be addressed and connections will be made. Our “wells” of spirit, hope, and endurance will be celebrated.

Kay Bernard holds two Master’s degrees and received her Doctorate from United Theological Seminary of the Twin Cities, an ecumenical seminary. DAILY PRACTICE SUCKS

Centennial Student Union 254
Discussion/experiential

In this workshop, we will engage in a guided meditation, followed by a discussion on how we are helped and hindered in our spiritual journeys by our spiritual history. To make progress in our spiritual journey, we need to come to terms with our spiritual past. We need to become aware of the baggage we choose to carry. We need to explore our biases and find ways to move beyond them. As an author of spirituality-based books, I recommend daily practice, along with most spiritual systems. However, 30 plus years of experience has taught me it’s not always easy. If you are interested in establishing a daily practice, or if you are not happy with the one you are doing, this is the workshop for you.

What is enough? Is there ever enough? Is anyone or anything enough. Are you enough? In our culture it may seem that there is no such thing as enough, we always want more. MATRIARCHY IN MINOAN CRETE: A PERSPECTIVE FROM ARCHAEOLOGY AND MODERN MATRIARCHAL STUDIES
Also in Session II
Armstrong Hall 317
Formal paper

Ancient Crete evokes many of the image of a highly sophisticated civilization: peaceful, artistic, and refined; a society in which women were highly visible and important, and the supreme deity was a Goddess. Yet despite the fact that authorities acknowledge that women played a major role in the Minoan society, and the preeminent Minoan deity was female, there is a gap in the scholarly literature regarding the role of women and matriarchy in Minoan Crete. In this workshop, we will discuss the results of the presenter’s dissertation in which using the latest archaeological finds, and the emergent fields of archaeoastronomy and modern matriarchal studies, she makes a compelling case for a matriarchal Bronze Age Crete based on the definition of matriarchy offered by Heidi Goetner-Abendroth.
